Return a Kindle Book Order

I book order within seven days.

Where a book has been partially read or in cases of abuse, refunds may be denied. Approved refunds are credited to the original payment source within three to five days.

1. Go to Manage Your Content and Devices and sign in with the Amazon account you used to make the purchase.
2. From **Your Content**, select the **Actions** button next to the title, then select **Return for Refund**.
3. In the pop-up window, choose the reason for return (optional), then select **Return for Refund**.

Note: If you have a high rate of return requests in your account history or you have partially read a book, the self-service refund option may not be available to you.

Cancel Your Kindle Unlimited Subscription
Kindle Content Help

Identify Which Kindle Books Have Been Read

Easily separate books you have already read from those books still in progress or not yet started.

Kindle books automatically display as **Read** when you turn the last page.

On your **smartphone**:

1. Select **Library** on your device.
2. Use the **Filter** button to select either **Read** or **Unread**.

On your **tablet**:

1. Select **Read** or **Unread** directly from the sidebar navigation.

Transfer Your Kindle Content to Another Country or Region

If your country or region has changed, you can transfer Kindle content you've purchased to match your new local Amazon marketplace. Kindle Unlimited subscriptions can't be transferred.

Transferring your Amazon account to another country or region transfers your digital content to the new account. It also allows you to purchase content from the Kindle Store in your local currency.

1. Go to Manage Your Content and Devices and click **Preferences**.
2. Click **Change** under **Country Settings**.
3. Select or enter your address, and click **Update**.
4. Follow the on-screen prompts to learn more about what will happen if you transfer your Amazon account.
5. When you're ready, select the option to transfer your account to complete the process.

Note:

Kindle Unlimited subscriptions can’t be transferred to a new country or region. If your country changes, your subscription is cancelled and your titles borrowed through Kindle Unlimited are automatically returned.

After your account is transferred, you can check if Kindle Unlimited is available in your new country or region by visiting Kindle Unlimited.

Other subscription services, such as Subscribe with Amazon, will also be cancelled.

Update Your Kindle Book Version

Receive the most updated version available for your Kindle books including corrections and improvements.

---

1. Go to Manage Your Content and Devices.
2. Search for your Kindle book.
3. If available, select **Update Available**, then select **Update**.

Tip: To receive automatic book updates as they become available from the publisher or author, enable **Automatic Book Update** on the **Preferences** tab in Manage Your Content and Devices.

Update Your Sync Settings for Kindle

Easily pick up where you left off across your Kindle apps and devices. Access your notes and highlights regardless of which device you're using.

Important: The Legacy Kindle app (previously called Kindle for PC) isn't supported as of June 30, 2026. To download the new Kindle for Windows app, go to Install or Update the Kindle App for Desktop.

Sync automatically backs up and saves data from your Kindle devices and apps, including your reading position, notes, and highlights, to Amazon's servers. Saved data syncs with all Kindle apps and devices linked to your account so you always have it readily available.

Sync, is already enabled by default on all Kindle devices and apps. Your device needs to be connected to the internet for Sync to work.

If you would like to turn Sync off or on, use these steps.

To turn Sync off or on in Kindle apps for **iPhone, Android phone, Mac, or Windows** :

1. Open the Kindle app.
2. Select **More**.
3. Select **Settings** (gear icon on top right).
4. Select **Sync**, and confirm whether it’s off or on.

To turn Sync off or on in Kindle apps for **iPad or Android tablet**:

1. Open the Kindle app.
2. Select the **More** from the sidebar navigation.
3. Select **Settings**.

4. Select **Sync**, and confirm whether it's off or on.

To turn Sync off or on for **Kindle E-Readers**:

1. Select **More**.
2. Select **Settings**.
3. Select **Device Options**.
4. Turn **Sync** off or on, and then confirm your choice.

You can also turn Sync off or on for all Kindle apps and devices linked to your account.

1. Go to Manage Your Content and Devices.
2. Select the **Preferences** tab.
3. Select **Sync Settings**.
4. You can now turn this setting off or on.

If you turn off this setting, usage data won't automatically save to Amazon's servers. Some features are unavailable, including sharing your reading position across devices, and Export/Share for notes. Also, any notes, highlights, or bookmarks made while Sync is turned off, may be lost when turning this setting back on.

Note: If you use Kindle for Web (read.amazon.com) after turning off Sync, all data generated while you use Kindle Web Reader will continue to save to Amazon's servers but won't sync to your other Kindle devices and apps.

For more on how Amazon handles your information, go to our Privacy Notice.

Redeem a Kindle Book Gift

Did you receive a Kindle book gift email? Accept your gift from the email notification to begin reading on your supported Amazon device or download a Kindle reading app.

---

1. Select **Redeem your gift** from your gift notification email.
2. Select **Redeem now** and if prompted, log-in to your Amazon account.
3. From the drop-down menu, select the supported Amazon device you want your gift delivered to.

The Kindle book gift link expires after 365 days. The person who gave you the gift receives a refund.

Send Books to Your Kindle E-Reader Manually

Send books to devices registered to your account.

To send a book to your Kindle e-reader manually:

1. Log in to the account you used to purchase your book.
2. On the **Content** tab of the Manage Your Content and Devices, select **Books** from the drop down.
3. Select **Deliver or Remove from Device**, and you'll find a list of all your devices registered to that account.
4. Choose your preferred device or devices, and then **Make Changes**.

Note: Send documents to your Kindle library on your Kindle devices and Kindle app using Send to Kindle at no additional cost.

Learn About Kindle Unlimited

With a Kindle Unlimited subscription, you can borrow from our large collection of digital books. Simply look for the Kindle Unlimited badge, download, and start reading.

Eligibility

To use Kindle Unlimited, you must have an Amazon account with a current, valid payment method.

For more information on availability, go to: Kindle Unlimited Eligible Countries & Territories.

Using Your Subscription

You can access Kindle Unlimited on any Kindle device, smartphone, computer, or tablet through the free Kindle app.

Borrow up to 20 titles at a time from a wide selection of genres, all with no due dates. When you want something new, return your current selections and dive right into fresh titles.

Tips for finding Kindle Unlimited titles:

- You can find Kindle Unlimited books in both the Kindle Store and your library by turning on the Kindle Unlimited filter in your Kindle app.

Please note that titles in the Kindle Unlimited catalog can change at any time.

Managing Your Subscription

To sign up, manage, or cancel your subscription, visit Kindle Unlimited.

For help updating your payment method, go to How to Update Your Amazon Payment Method.

For help canceling your subscription, go to: Cancel Your Kindle Unlimited Subscription.

Update Your Kindle Unlimited Membership Payment Information

Want to use a different card for your Kindle Unlimited subscription?

---

1. Go to Manage your Kindle Unlimited Membership and sign into your Amazon account.
2. Under **Payment Details**, select **Update Payment**.
3. Select a different card option, or enter a new one.

For more help, go to:

How to Update Your Amazon Payment Method

Cancel Your Kindle Unlimited Subscription

Follow these steps to cancel your .

---

1. Go to Manage your Kindle Unlimited Membership and sign into your Amazon account.

2. Under **Your Membership**, select **Cancel membership**.
   Your membership remains active until the next billing date. After the billing date passes, you lose access to content that you have checked out.

Tip: You can also choose to pause your monthly subscription for a period of 1 month, instead of cancelling. The pause becomes effective at the end of the billing cycle. Your subscription resumes automatically, or you can resume it anytime while paused. You can't pause your subscription while on a free trial, or promotional period.

If you pause your subscription, you can resume it from .

Buy Kindle Books for Others

You can use your Amazon account to purchase Kindle books in bulk and distribute them to others.

Note:

- Kindle eBooks can only be redeemed by recipients in your same country. Recipients outside your country cannot redeem any Kindle eBooks sent to them. You can distribute any unredeemed copies to other recipients or request a refund for unredeemed copies. Only unredeemed copies can be refunded. For more information about refunds, check out Return Unredeemed Kindle Book Gift Orders.
- Amazon Business customers can't purchase Kindle books as gifts.

To buy Kindle books for others:

1. Go to the Kindle eBook's product detail page on Amazon.
2. In the **Buy for others** box select the quantity you want to purchase.
3. Select the **Buy for others** button and then enter the details for your gift recipients. If you didn't provide a recipient email address, instructions on how to manage your books are emailed to you after the order is complete. Go to Send Kindle Books to Individual Recipients for more information.

To print a receipt for your gift order:

1. Go to మీ ఆర్డర్‌లు, and find the gift order.
2. Select **Show Receipt**, and then **Print this page for your records**.

Note: Kindle books and redemption links cannot be resold.

For more help, go to:

Send Kindle Books to Individual Recipients
Send Kindle Books to a Group
Redeem a Kindle Book Gift
Return Unredeemed Kindle Book Gift Orders

Return Unredeemed Kindle Book Gift Orders

Request a refund for unredeemed Kindle books within 30 days of purchase.

A single purchase order can be returned only if it has not been redeemed.

Note: Orders delivered to the receiver or redeemed by the receiver are not eligible for return.

1. Go to Your Orders and sign in with the same Amazon account information you used to purchase your content.
2. Locate your order or title and select **Return unredeemed books**. All unredeemed copies will be returned.
3. Select your reason for return, and then **Submit**.

Cancel an accidental book order within 30 days. Only orders for books that have not been redeemed within 30 days from purchase can be cancelled. The redemption link expires after 365 days from the date of purchase.

Approved refunds are credited to the original payment method used to make the purchase and usually completed within 2-4 business days.

Send Kindle Books to Individual Recipients

When buying books for others using the "Buy for others" option, you can send books to recipients by entering their email during your checkout or do it from Your Orders.

---

1. Go to Your Orders.
2. Locate your order and select **Manage eBooks**.
3. Select **Copy link with instructions** next to the link you'd like to send.
4. Open your email program and paste the link and instructions into the body of a new email.

5. Enter the recipient's email address and the email subject, and send the email.

Note:

- If you don't live in the same country as your recipient, the book won't be available for your recipient. The recipient is unable to redeem the book and you may distribute that copy to another recipient or request a refund on the unredeemed copy.
- Amazon Business customers can't purchase Kindle books as gifts.

Send Kindle Books to a Group

Use the provided spreadsheet after checkout, with tools like mail merge, to send book redemption links to multiple recipients at once.

---

1. Go to మీ ఆర్డర్‌లు.
2. Locate your order and select **Manage eBooks**.
3. Select **Download spreadsheet**. The spreadsheet is a comma separated value (CSV) file containing redemption links that have not been redeemed.
4. Open the file and fill in your recipients' names and email addresses.
5. Download an email template and open it.
6. Customize the message and fill in the highlighted portion.
7. Use a tool like mail merge to combine the template and spreadsheet and send out emails.

Note:

- If you don't live in the same country as your recipient, the book won't be available for your recipient. The recipient is unable to redeem the book and you may distribute that copy to another recipient or request a refund on the unredeemed copy.
- Amazon Business customers can't purchase Kindle books as gifts.

Redeem a Prepaid Kindle Book

When you receive a prepaid Kindle book, you can redeem it immediately and read on your compatible Amazon device or download a Kindle reading app.

Note: If you do not live in the same country as the person who sent you the prepaid Kindle book, the book will not be available to you due to country restrictions. The prepaid Kindle book may also be unavailable if someone else has already used the redemption link or if the person who sent you the book has requested a refund. In these cases, please contact the person who sent you the book to request another copy.

1. If you received a notification email from the person who purchased the book, click the redemption link in the email. Your browser opens an Amazon page to accept the book. If you received the redemption link printed on a physical piece of paper, type the redemption link into the address bar of your browser.
2. Sign in using your Amazon account details, then click **Accept this eBook**.
   Note: If you do not yet have an Amazon account, provide your information to create your Amazon account and click **Accept this eBook**.
3. After accepting your book, you can immediately begin reading your book in the Kindle reading app. Your book will also appear in Cloud or Archived Items on any other Kindle devices or Kindle reading apps registered to your account.

The redemption link expires after 365 days from the date of purchase.

Learn About Sending Documents to Your Kindle Library

The Send to Kindle service allows you to send documents to your Kindle library on your Kindle devices and Kindle app at no additional cost. You can upload documents through the web, an authorized email address, the Kindle app for iOS and Android devices, or a Send to Kindle application if available. All documents sent through Send to Kindle are protected with end to end encryption.

Send to Kindle for Web

Upload documents (200 MB or smaller) directly from your device with Send to Kindle for Web. Make sure to turn on **Add to your library** so that you can download documents in your library to any device linked to your account.

Use Send to Kindle for Web to upload documents to your device. Send to Kindle

Send to Kindle from the Kindle App for iOS and Android Devices

Send documents to your Kindle library from your iOS or Android phone or tablet using the free Kindle app for iOS and Android.

- Send to Kindle iOS
- Send to Kindle Android

Send to Kindle for Email

Send your file(s) as an attachment to your Send to Kindle email address. Your Send to Kindle email address is a unique address assigned to each compatible device and Kindle app on your account.

Send to Kindle Desktop Applications

Send documents from your desktop directly to your Kindle library, using the Send to Kindle app for Mac and Windows.

- Send to Kindle Mac
- Send to Kindle Windows

Send to Kindle Chrome Extension

Send web content like articles, blog posts, and more, to your Kindle library using the Send to Kindle Chrome browser extension.

Send to Kindle - Supported File Formats

Send to Kindle supports the following file types:

- HTML (.HTML, .HTM)
- RTF (.RTF)
- Text (.TXT)
- JPEG (.JPEG, .JPG)
- GIF (.GIF)
- PNG (.PNG)
- BMP (.BMP)

- PDF (.PDF)
- EPUB (.EPUB)

For more help, go to:

Troubleshoot Send to Kindle Errors
Learn How to Use Your Send to Kindle Email Address
Disable Document Archiving in Your Kindle Library
Kindle Personal Document File Types That Support Notes

Edit Your Send to Kindle Email Address

Customize your Kindle email address, used with the Kindle Personal Document Service, to make it more secure.

---

1. Go to Manage Your Content and Devices.
2. From **Preferences** scroll down to **Personal Document Settings**.
3. Under **Send to Kindle Email Settings**, your Send to Kindle email address is listed for your compatible device or app.
4. To change this email address select **Edit** next to your device, enter a new email address, and then select **Save** to save your changes.

Learn How to Use Your Send to Kindle Email Address

Send documents directly to your Kindle Library through Send to Kindle for Web, by email or with the Send to Kindle app if available.

With your Send to Kindle email address, you can:

- Send up to 25 attachments in one email.
- Send to your Send to Kindle email from up to 15 approved email addresses.
- Send a total size of 50 MB or less. Compress your documents into a ZIP file to send more than 50 MB. The conversion service automatically opens the ZIP files and converts them to the Kindle format.

For your email to be delivered successfully:

- Add the sender's email address to your Approved Personal Document Email List on the Manage Your Content and Devices page.
- Verify that the document is a supported file type.
- Attach the document to your email.
- Be sure that your device is connected to the internet. The delivery for your documents will be attempted for up to 60 days.

For more help, go to:

Add an Email Address to Receive Documents in Your Kindle Library
Learn About Sending Documents to Your Kindle Library (including supported file types)
Kindle Personal Document File Types That Support Notes

Disable Document Archiving in Your Kindle Library

To stop automatic storage of documents in Manage Your Content and Devices, disable automatic document archiving.

---

1. Go to Manage Your Content and Devices.
2. Select the **Preferences** tab, and then scroll to **Personal Document Settings**.
3. Under **Personal Document Archiving**, select **Edit Archive Settings**.
4. Uncheck the box next to **Enable personal document archiving to my Kindle library** and select **Update**.

Add an Email Address to Receive Documents in Your Kindle Library

You only receive documents from email addresses that you've added to your Approved Personal Document Email List in Manage Your Content and Devices.

---

1. Go to Manage Your Content and Devices.
2. From **Preferences** scroll down to **Personal Document Settings**.
3. Select **Approved Personal Document Email List**, and check for your email address. If you didn't find your email address, select **Add a new e-mail address**.
4. Enter the desired email address, make sure it's complete and valid, and then select **Add Address**.

Learn About Two-Factor Authentication for Your Kindle Library

Two-factor authentication is a security step that helps ensure you only receive documents from sources you trust.

When you send a document to your Send to Kindle email address, you receive an email asking you to verify your request within 48 hours. Avoid two-factor authentication by making your Send to Kindle email address sufficiently secure.

- Ensure your Send to Kindle email address is different than any other email addresses you use.
- Use a combination of uppercase letters, lowercase letters, and numbers.
- Avoid including any personally identifiable information.

What is Word Wise?

Get simple definitions and synonyms displayed inline above more difficult words while you read.

Word Wise is only available in books in English and isn’t enabled on all Kindle books. You can verify whether the feature is available by checking for "Word Wise: Enabled" or "Word Wise: Not Enabled" on the product detail page of the Kindle book.

Use Word Wise on the following devices and Kindle reading apps with the latest software version:

- Any Kindle e-reader (6th Generation and newer)
- Kindle for Android

If you'd like, you can deactivate Word Wise from within your book. Tap the top of the screen to access the menu, then choose the **Aa** menu and select **More**. Scroll down to Word Wise and switch the option to off.

Learn About Accessibility Information for Kindle Books

Kindle book listings include accessibility information that you can use to determine if a book meets your needs. All accessibility information displayed for Kindle books is based on details provided by the publisher.

You can find the accessibility icon in the book details section. If you don't find the icon, you may need to scroll to a second screen of icons. To review the book's accessibility details, select **Learn more** below the accessibility icon  .

Visual Adjustments
Nonvisual Reading
Hazards
Conformance
Navigation
Other Features
Troubleshooting

Visual Adjustments

Books that support visual adjustments allow you to modify the appearance of the text and the page layout. You can adjust the visual appearance, which can increase readability and make it easier to comprehend the text.

Kindle books come in two different formats:

- Reflowable Kindle books allow for the modification of the appearance by adapting to your device's screen size and your chosen font and layout settings.
- Fixed layout books include print replica, manga, comics, and some children's books or textbooks. With this format, books preserve their layout and structure and don't allow for visual adjustments.

A book will include one of the following descriptions for visual adjustments:

- **Appearance can be modified**: The text of this Kindle book can be adjusted (e.g., size, font, color, margins, spacing, alignment)
- **Appearance cannot be modified**: The text of this Kindle book cannot be adjusted (e.g., size, font, color, margins, spacing, alignment)
- **Not known if appearance can be modified**: No information is available about the capability to adjust the text of this Kindle book (e.g., size, font, color, margins, spacing alignment)

For more on accessibility features in Kindle that allow readers to modify the appearance of the text, visit Kindle Accessibility.

Nonvisual Reading

Nonvisual reading indicates whether all content required for comprehension can be consumed in text and is accessible to users of assistive technologies. Some examples of compatible assistive technologies include screen readers and refreshable braille displays, typically used by people who are blind or have low vision.

The text of most reflowable Kindle books is accessible. However, when Kindle books include content such as images, photographs, graphs, tables, or videos, textual alternatives may be required for comprehension. Without the textual alternatives, the book won't be considered readable in read aloud and braille.

Textual alternatives could include alt text, extended descriptions, transcripts, and captions. Currently, print replica and image-based fixed layout Kindle books aren’t readable in read aloud and braille.

Note: Kindle books don't currently support closed captions in audio/video content.

A book will include one of the following nonvisual reading descriptions:

- **Readable in read aloud and braille**: The text of this Kindle book is accessible to screen readers, and all meaningful non-text content has text alternatives (e.g., images have alt text and/or extended descriptions).
- **Partially readable in read aloud and braille**: The text of this Kindle book is accessible to screen readers, but some meaningful non-text content may not have text alternatives (e.g., image alt text and/or extended descriptions).

- **Not readable in read aloud and braille**: The text of this Kindle book is not accessible to screen readers. Note: Print replica and image-based Kindle books (e.g., comics, manga) do not currently support nonvisual reading.
- **Not known if readable in read aloud and braille**: No information available about the nonvisual reading aspects of this Kindle book.

Hazards

Hazard labels help you determine whether there are any potential hazards present in the Kindle book that could afflict physiologically sensitive readers. Potential hazards only exist within a Kindle book that contains audio and/or video content.

Note: Audio and/or video files don't start automatically. The reader must start the file.

A book will include one of the following hazard warning descriptions:

- **This Kindle book contains no hazards**: Note: This refers to books with no audio/video content, or books with video content in which the publisher has confirmed that there are no hazards present.
- **This Kindle book contains the following hazards**:
    - **Video with a flashing hazard**: Note: This refers to video content with flashing that occurs more than 3 times per second or doesn't meet the general flash or red flash thresholds.
    - **Video with motion simulation**
    - **Audio**
-
- **This Kindle book contains audio or video which may include flashing, motion simulation, or sound.**
- **No information available about potential hazards in this Kindle book.**

Conformance

Conformance labels help you identify whether the digital publication claims to meet internationally recognized conformance standards for accessibility.

The only time Conformance information displays is if it's provided by the publisher. Conformance claims include the specific set of accessibility requirements that the Kindle book purports to meet and, if applicable, will include the certifier’s name. For example: WCAG 2.0/2.1/2.2 Level A/AA/AAA.

Navigation

One or more navigation labels may display if the publisher indicates that the Kindle book includes navigational features to support accessibility. Possible navigational features include:

- **Table of contents**: The book includes a table of contents for navigating to the major sections of the book.
- **Index**: The book contains one or more indexes of the content. Examples of possible indexes: a topical index or an index of names. Indexes allow readers who can't see the text or have difficulty following it to find and return to subjects more easily.
- **Real page numbers that correspond to an equivalent print book**: The book contains references to the page numbering of an equivalent print book.
- **Heading markup for screen reader users**: The book contains heading tags so that users of assistive technologies can understand the structure of the book without having to use the table of contents.

Other Features

You can review Other Features labels to find out if the Kindle book includes one or more additional accessibility features not listed in the preceding sections. If information about the available accessibility features is provided, it's displayed in this section. Possible features that may be included at this time are:

- **Audio/video**: This Kindle book includes audio and/or video media.
  Note: Kindle books don’t currently support closed captions in audio/video content.
- **Extended descriptions**: Complex images in this Kindle book include long descriptions for blind and low vision readers.
- **Accessible math content**: MathML markup language was used to encode the mathematical equations in this Kindle book.

Troubleshooting

In general, a book that supports visual adjustments and nonvisual reading will be accessible when read with any Kindle device or app.

However, there are some limitations to be aware of. Not all Kindle book accessibility features are fully supported across all Kindle devices and apps. For example, you can't currently read alt text and mathML on Kindle e-readers.

For more information about current support for accessibility features on our Kindle devices and apps, visit: Kindle Accessibility.

To report an error in the accessibility information of a Kindle book:

1. Select the **Report an issue** link, located in every Kindle book detail page below the book description and details.
2. Select **Report** beneath where it says "Does this item contain quality or formatting issues?".
3. Select **Poor formatting**.

Tip: As an example, you might report a book that's labeled as "Readable in read aloud and braille," but does not include text alternatives for meaningful images within the book.

Learn About Prime Reading

Prime members can borrow up to 10 eligible titles at a time from a large selection.

Prime Reading offers a rotating catalog of Kindle Unlimited titles for you to choose from.

To find Prime Reading books, go to Prime Reading in your browser. When you find a title you want to borrow, select **Add to Library**.

When you want to return a Prime Reading title:

1. Go to Manage Your Content and Devices.
2. From the **Your Content** tab, use the drop-down menu to filter by **Prime Reading**.
3. Select **Return this title** and confirm when prompted.

I want to cancel Prime membership

With your Prime membership, you enjoy benefits such as free - fast delivery, music, video, and access to exclusive member only deals.

If, however, you wish to end your Amazon Prime membership:

1. Go to Manage Prime Membership ,

2. Click End membership and

3. Follow on-screen instructions.

Switch between monthly and annual Prime plan

If you wish to switch between monthly and annual Prime plans, please wait until your current plan ends. After that, sign up for your preferred plan.

View Prime plans

My Prime membership is not renewing automatically

Auto-renew can be set up for Prime Shopping Edition. Prime Shopping Edition membership purchased using payment methods that support e-mandate, such as Credit / Debit cards and UPI will be auto-renewed.

Prime Shopping Edition members who have not purchased the membership using an e-mandate supported payment method, can update their payment method to an e-mandate supported Credit/Debit Card or UPI by going to "Manage Prime membership" section on Amazon.in.

Review with other plans

I want to see Prime benefits

Set Parental Controls on Fire TV

Turn on parental controls to restrict access to videos, purchases, and certain types of content.

---

1. Go to **Settings**  from your Fire TV menu.
2. Select **Preferences**  and then select **Parental Controls**.
3. To activate or deactivate parental controls, select the **Parental Controls** option and enter your PIN.
4. Select the options that you want to PIN protect. You can turn on or off PIN protections for the available options on your device.

Depending on the options you turn on, you have to enter your PIN before watching videos in restricted categories, purchasing content, or opening apps.

For more help, try our Amazon Fire TV forum.

Initial Setup for Alexa Home Theatre with HDMI ARC on Compatible Fire TV Device

To play audio from your TV and other HDMI sources (like a game console) through your Echo speakers, set up Alexa Home Theatre with HDMI ARC.

The following Fire TV devices are compatible with Alexa Home Theatre with HDMI ARC:

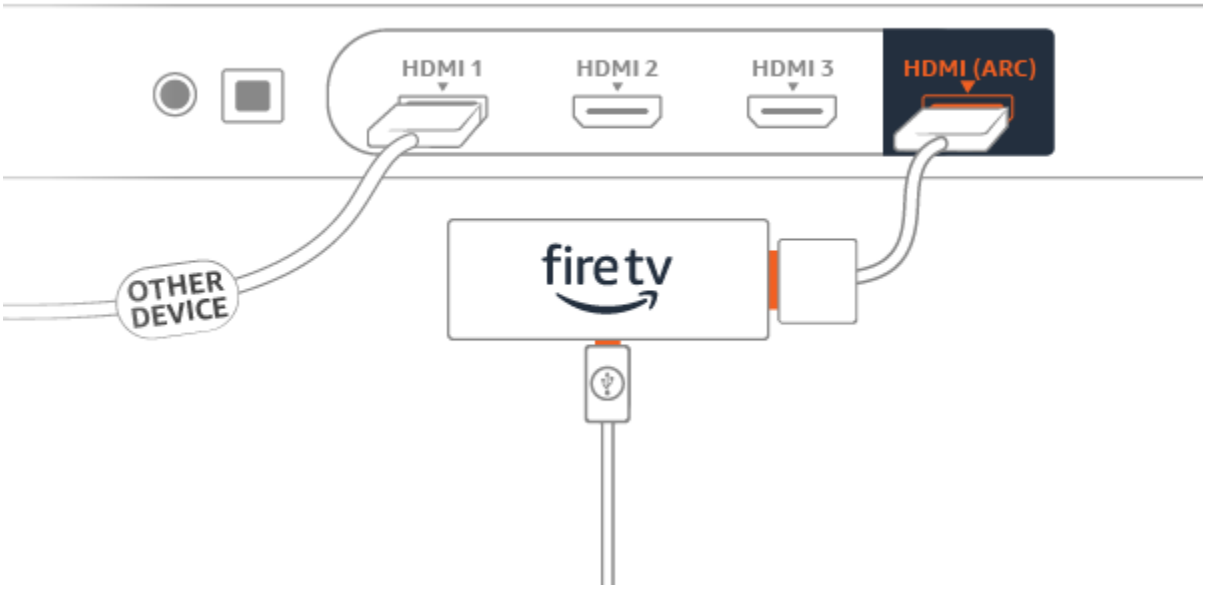

- Fire TV Cube (3rd Generation)
- Fire TV Stick 4K Max (1st Generation)
- Fire TV Stick 4K (2nd Generation)
- Fire TV Stick 4K Plus

To set up Alexa Home Theatre, you need:

- A compatible Fire TV device.
- Compatible Echo devices. For a list of compatible devices, go to Alexa Home Theater Device Compatibility Guide.
- A TV that supports HDMI ARC. To check if your TV supports this setting, review your TV's user manual or online support pages.

To set up Alexa Home Theatre with HDMI ARC:

1. Plug your Fire TV device into the HDMI port labeled "ARC" on your TV. If you have another device connected to that port, move it to a different HDMI port.

2.
3.
4. For TV Cube (3rd Generation), plug the HDMI cable from the Fire TV Cube into the HDMI port labeled "ARC" on your TV.
5. If you have a sound bar or A/V receiver, unplug it from the HDMI port on your TV. Alexa Home Theatre only supports playing audio through Echo devices.
6. Turn on the HDMI ARC setting on your TV with the remote that came with your TV. You may need to turn on the HDMI CEC setting manually.
   Tip: For step-by-step instructions on how to turn on the HDMI CEC setting on your TV, go to Manage the HDMI ARC or HDMI CEC Setting on Your TV.
7. Check the audio settings on your TV. Go to the settings on your TV and select audio settings such as **PCM** or **Stereo**. If you have an Echo Studio, select **Bypass**, **Passthrough**, or **Auto**. These terms vary based on your TV brand.
8. To finish setting up your Alexa **Home Theatre**, go to Setup Alexa Home Theater on Your Fire TV.

If you move your devices to different HDMI ports, update the port locations on your Fire TV:

1. Go to **Settings**  from your Fire TV menu.
2. Select **Equipment Control**.
3. Select **Manage Equipment**.
4. Select the device that you had to move.
5. Select the new HDMI port that you plugged it into.
6. Repeat these steps for each device that you moved.

For more help, go to:

Manage the HDMI ARC or HDMI CEC Setting on Your TV

Update the Software on Your Fire TV

To update your device's software version, go to **Settings**  from your Fire TV menu.

---

1. Go to **Settings**  from your Fire TV menu.
2. Select **My Fire TV** or **Device & Software**.
3. Select **About**.
4. Select **Check for System Update**.

For more help, try our Amazon Fire TV forum.

Update Your Fire TV Remote's Software

Go to your Fire TV **Settings** to update the software of your remote.

---

1. Use your remote or the Fire TV app  to go to **Settings**  on your device.
2. Select **Controllers and Bluetooth Devices**.
3. Select **Amazon Fire TV Remotes**.
4. Select your remote from the list.

If an update is available, you can install it from this screen.

For more help, try our Amazon Fire TV forum.

Use Your Amazon Fire TV in a Different Country

Take compatible Amazon Fire TV devices with you if you're moving or traveling outside your home country.

Note: Residents of the European Union, while traveling within the European Union, have access to the same titles that are available when streaming from their country of residence.

Amazon Fire TV devices work in the following supported countries:

- Australia
- Austria
- Brazil
- Canada
- France
- Germany
- India
- Ireland
- Italy
- Japan
- Mexico
- Netherlands
- Poland
- Spain
- Sweden
- United Kingdom
- United States

Fire TV Stick Basic Edition works in:

Albania, Barbados, Belgium, Bermuda, Bolivia, Bosnia and Herzegovina, Bulgaria, Cambodia, Chile, Colombia, Costa Rica, Croatia, Cyprus, Czech Republic, Denmark, Ecuador, Estonia, Finland, Ghana, Greece, Hong Kong, Hungary, Iceland, Ireland, Jamaica, Kenya, Latvia, Liechtenstein, Lithuania, Luxembourg, Macao, Malta, Namibia, Netherlands, New Zealand, Norway, Panama, Peru, Philippines, Poland, Portugal, Romania, Serbia, Singapore, Slovakia, Slovenia, South Africa, Sri Lanka, Sweden, Switzerland, Taiwan, Thailand, Trinidad & Tobago, Uruguay, Venezuela.

To use your compatible device in a different supported country, change the country settings for your Amazon account.

Important:

- Content availability varies by country.
- Some apps and games may not work in your new country. If you have questions about app compatibility, contact the app developer.

Watch While Abroad

Note: Residents of the European Union, while traveling within the European Union, have access to the same titles that are available when streaming from their country of residence.

The **Movies** and **TV Shows** categories in the Fire TV menu change automatically to include **Watch While Abroad** rows. These rows show all titles included with Prime that are available to watch while traveling abroad without changing your account settings.

For more help, go to:

Change your Amazon Account Country

Manage Sharing of Viewing Information from Apps on Fire TV

You can manage the sharing of viewing and content information from supported third-party apps on Fire TV.

Note: This setting is only available on Fire TV devices with a **Continue Watching** row. To learn more, visit How Does the Continue Watching Row Work?

1. Go to **Settings**  from your Fire TV menu.
2. Select **Preferences**  .
3. Select **Privacy Settings**.
4. Select **Manage Sharing From Apps**.
5. Choose from the following options:
    - **Manage Participating Apps**: Manage sharing options from specific apps. A checkmark appears next to an app when sharing is **On**.
    - **Share App Viewing and Content Info**: Turn on or off sharing from all supported apps.
    - **Sync Across Devices**: Turn off to stop syncing your viewing activity across your Fire TV devices.
6.

For more help, go to:

[Manage App Permissions on Fire TV]

About Auto Offload on Fire TV

When your device is low on storage, the Auto Offload feature helps to free up storage by offloading infrequently used apps.

After 60 days, unused apps may be offloaded automatically. Offloaded apps save your login information and settings preferences so you can easily redownload the app and start using it again.

When an app is offloaded, a cloud icon  appears on the app.

Note: To use Auto Offload, you need an internet connection.

You can also choose which apps you'd like to offload by:

- Going to **Manage Installed Applications** in your Fire TV settings.

- Highlighting an app and pressing the **Menu** button  on your remote. **Note:** For devices with the New Fire TV Experience, press and hold the **Select**  button.

Auto Offload is on by default on your device. You can turn Auto Offload on or off in your Fire TV settings by going to **Applications**, and then **Auto Offload**.

The storage optimizer isn't available on:

- Fire TV Stick (2nd Generation)

Amazon Fire TV Software Security Updates

This page provides information about software security updates for Fire TV streaming media players, smart TVs, and soundbars, made by Amazon.

We'll support your device with software security updates until at least four years from when you bought it new, from Amazon as the seller, on Amazon.in (or until the date stated below if later). If you got your device somewhere else, we'll support it with software security updates until at least the date stated below.

After that time, we may continue to provide software security updates for as long as we can (subject to technical and other limitations). Please note the update period is not a guarantee as to how long your device will last. If you already own a Fire TV streaming media player, smart TV, or soundbar, visit Manage Your Content and Devices for information specific to your device, including trade-in (geographical limitations may apply) and recycling options (geographical limitations may apply). You can find more information about your device and its applicable warranty on the Amazon Device Warranty page.

FAQs

Q. What if I purchased my device from another seller on Amazon.in or my device was a refurbished unit?

A. For refurbished devices and devices purchased from other sellers please check the below tables or visit Manage Your Content and Devices.

Fire TV Streaming Media Players	Software Security Updates at Least Through
Fire TV Stick 4K Select	31 December 2030
Fire TV Stick 4K Plus	31 December 2030
Fire TV Stick 4K (2nd Generation)	31 December 2030
Fire TV Stick HD (2nd Generation)	31 December 2030
Fire TV Stick HD (1st Generation)	31 December 2030
Fire TV Stick Lite	31 December 2030
Fire TV Stick (3rd Generation)	31 December 2030
Fire TV Stick 4K Max (1st Generation)	31 December 2030
Fire TV Stick 4K (1st Generation)	31 December 2029
Fire TV Cube (3rd Generation)	31 December 2030

Change Your Echo and Fire TV Sound Settings on Fire TV

Manage gaming audio, volume control, and lip sync tuning.

1. Go to **Settings**  from your Fire TV menu.
2. Select **Display & Audio**, then **Home Theatre Settings**.
3. Select [option name] from the available on-screen options.

For more help, try our Amazon Fire TV forum.

What is Amazon Luna?

Amazon Luna is a gaming service that offers both cloud gaming and allows you to claim PC games.

Amazon Luna Standard is included with your Prime membership and offers:

- Cloud streaming of curated library of games.
- Family-friendly party games through GameNight.
- Games you can claim and keep.
- Cloud streaming of games you've purchased.

You can claim PC downloadable games by:

- Visiting luna.amazon.com/claims on PC, Mac, or mobile device.
- Select from games available in your region.
  Note: Available in 200+ countries. Check out eligible regions here.

Subscribe to a Twitch Channel Using Prime

As a Prime member, you receive one free Twitch Channel subscription per month. This grants you channel-specific subscriber perks that come with a regular subscription such as ad-free viewing, emotes, and a chat badge.

The **Free Twitch channel subscription with Prime** subscription option only displays if:

- Twitch subscriptions are available in your location.
- You are a Prime member.
- The streamer is a Partnered or Affiliate channel.

- You haven't already claimed your monthly Twitch Channel Subscription in the past month.

Note: While Amazon Prime Trial members (including Prime Student) are eligible to receive a free Twitch channel subscription during their no-cost free trial, this is a one-time perk. If you've used an Amazon Prime Trial previously, you aren't eligible to receive a Twitch channel subscription during subsequent no-cost Trials.

1. Select **Subscribe** on the Channel page.
2. Select the **Subscribe with Prime** box.
3. Select the **Subscribe** button.

Twitch channel subscriptions redeemed with Prime do not auto-renew. Redeem your Twitch Channel subscription perk every month when it becomes available to remain subscribed with one specific channel.

Tip: To redeem a free Twitch channel subscription with Prime on mobile iOS, use the Safari browser.

Claim Games and More

Amazon Luna allows you to claim PC downloadable games.

---

1. Visit luna.amazon.com/claims.
2. Select the offer you wish to claim, and follow the offer's unique instructions.
   Note: Offers may vary by country.

Claim Games and More on Teen Accounts

Amazon Luna allows you to claim PC games that you can keep and play forever. Offers may vary by country.

Important: As of September 8, 2025, Teen account support has been discontinued. New teen account registrations through Amazon Family ended April 7, 2025.

- For existing teen accounts, an adult Amazon Family member can claim content on behalf of teen accounts.
- Teen account holders can access their past claims in **My Collection** via the drop-down menu.

Download and Install the Amazon Games App

Download and install the Amazon Games app on Windows to claim and play downloadable PC games with Luna.

---

1. Download the Amazon Games App.
2. Find and install the app. The file is named "AmazonGamesSetup.exe".
3. Log in to your Amazon account.
4. Claim and play games.

Experiencing trouble with the Amazon Games App?

If you're encountering issues installing a game or seeing your claimed games in your Amazon Games library, we recommend updating your app by following these steps:

1. Close the app on your computer, ensuring it's fully shut down.
2. Re-launch the app on your computer.
3. Attempt to install the game again.

What is My Collection?

My Collection provides you with one-click access to check the order history, claim codes, and delivery status of all your collected content.

Using My Collection, you can:

- Check the delivery status and destination of each game or offer claimed.
- Access your claim codes after the associated campaigns end.

For more help, go to:

- My Collection - Delivery Status Pending or Undelivered

My Collection - Delivery Status Pending or Undelivered

If the delivery status of your most recently claimed offer is Pending or Undelivered, try the following steps to access your claimed content.

Delivery Status Pending
If your claimed offer delivery status displays as **Pending** , this status usually means you claimed your content successfully, but didn't yet receive the offer in-game.

To resolve it, try logging into the game with the linked account you used to claim that content.

If you didn't access your content yet, and want to change the game account linked to your Amazon account:

1. Go to the offer on Amazon Luna.
2. Follow the link instructions in the FAQ of the detail page for the offer.
   Note: Linking instructions vary by game developer, so they can change from offer to offer.

Delivery Status Undeliverable

If your claimed offer delivery status displays as **Undeliverable** , it means that there was an issue successfully fulfilling your claimed content. Common reasons why an offer fails to deliver to your game account include:

- The game account that claimed the offer already claimed this content.
- The game account that claimed the offer isn't a valid account.

If an offer remains stuck in this state, please contact customer support customer support.

Troubleshooting Game Speed Issues

If you experience game speed issues while using the Amazon Games app, try the following.

Modify the VSync Settings

Sometimes your GPU renders more frames than your monitor can display. You can turn on VSync to ensure that your monitor is in sync with your GPU and displays every frame it renders.

For NVIDIA

1. Open the **NVIDIA Control Panel**.
2. Select **Manage 3D Settings**.
3. Go to the **Global Settings** tab, find **Vertical Sync**.
4. Select **On** from the drop-down menu.
5. Restart your computer so the change takes effect.

For AMD

1. Open **AMD Radeon Settings**.
2. Select **Global Settings** , and then **Wait for Vertical Refresh**.
3. Select the Down arrow, and then **Always on** to activate VSync.
4. Restart your computer so the change takes effect.

Try Different Compatibility Modes

1. Right-click the game's shortcut to go to the **Game's Properties**.
2. Select the **Compatibility** tab and try different compatibility modes.

Try Forcing the Game to Only use one Core

1. Go to **Task Manager** (Ctrl + Alt + Delete).
2. Select the **Details** tab.
3. Right-click the Game.exe.
4. Select **Set Affinity** , and then **CPU 0**.
5. Select **OK**.

Change Power-Saving Mode

1. Open **Control Panel**.
2. Navigate to **Power Options** and change **Power-Saving Mode** to **High Performance**.

Calling and Messaging Without Speech on Echo Devices with a Screen

Enable the feature to view Alexa's message transcripts and Alexa contacts on the screen.

---

1. Say, "Go to settings," or swipe down from the top of the screen and select **Settings**.
2. Select **Accessibility**.
3. Enable **Calling & Messaging Without Speech**.

Turn Adaptive Listening On or Off

With Adaptive Listening, you have more time to finish speaking before Alexa starts to respond - a setting designed for those who benefit from a slower conversational pace.

Note: Settings menu items for Echo Show 5 (all generations) may vary, and those devices will receive a software update soon.

To turn Adaptive Listening on or off from the Alexa app:

1. Open the Alexa app .
2. Open **More** .
3. Select **Settings** .
4. Select **Accessibility**.
5. Select **Adaptive Listening Mode**.
6. Select the device or devices that you want to use Adaptive Listening mode on.

You can also turn Adaptive Listening on or off from your Echo device's settings.

1. Say, "Go to Settings," or go to the device settings on your Echo Show:
    - If you're using Alexa+, select the **Menu** icon on your screen, and then select **Settings** .
    - If you're using the original Alexa, swipe down from the top of the screen and select **Settings** .

2.
3. Select **Accessibility**.
4. Turn **Adaptive Listening** on or off.

Note: Turning on Adaptive Listening may slow down the pace of your conversation.

What Speech Accessibility Options are Available for Echo Devices with a Screen?

Guide to the VoiceView Screen Reader on Your Echo Device with a Screen

The VoiceView Screen Reader reads aloud items that you touch on the screen. Use gestures to navigate your device while VoiceView describes the actions you make on screen.

Note: Settings menu items for Echo Show 5 (all generations) may vary, and those devices will receive a software update soon.

Use one of the following methods to turn on or off VoiceView:

- Say, "Turn [on/off] VoiceView."
- **Turn On:** Press and hold the **Microphones/Camera Enable/Disable** button. When you hear an alert, place two fingers (slightly apart) on the screen and hold for five seconds.
- **Turn Off:** Press and hold the **Microphones/Camera Enable/Disable** button. When you hear an alert, use a single finger to double tap the screen and hold for five seconds.
    - Echo devices with a screen: When facing the screen, the **Microphones/Camera Enable/Disable** button is the left-most button on top of the device.
    - Echo Spot: When facing the screen, the **Microphones/Camera Enable/Disable** button is in the middle on top of the device.
    - Echo Show 8 (2026 release) and Echo Show 11 (2026 release): When facing the screen, the **Microphones/Camera Enable/Disable** button is on the top button on the right side of the device.
-
- Access by Settings:

- Say, "Go to Settings," or go to the device settings on your Echo Show:
    - If you're using Alexa+, select the **Menu** icon on your screen, and then select **Settings** .
    - If you're using the original Alexa, swipe down from the top of the screen and select **Settings** .
    - Select **Accessibility**.
    - Select **VoiceView Screen Reader**.
    - Turn on or off **VoiceView**.
-

Customize your VoiceView experience by modifying user settings.

Tip: To access Settings when VoiceView is on, say, "Go to Settings," or swipe down from the top of the screen with three fingers. Or, place focus on **Settings** and double-tap to activate. Navigate to **Accessibility** and double-tap **VoiceView Screen Reader** for available settings. Select a setting, or swipe right on a setting to move to the next one.

Identify Products with Your Echo Show

Ask Alexa to identify common pantry products you're holding with Show and Tell.

Before you get started, make sure that there's good lighting in your room and that nothing is blocking your Echo Show's camera.

1. Hold your item one foot from your Echo Show's camera.
2. Say things like, “What am I holding?" or "What's in my hand?"
3. When prompted, move your item around slowly to show different sides of the packaging. Alexa helps you position the item with tips and sound.

Tip: For help using Show and Tell, say "Help with Show and Tell" or "More help with Show and Tell."

Turn On Captioning on Your Echo Devices with a Screen

You can use Closed Captioning or Alexa Captioning on your Echo Device with a Screen when available. Just say, "Turn on all captions."

Note: Settings menu items for Echo Show 5 (all generations) may vary, and those devices will receive a software update soon.

To turn on captions on your Alexa App or Echo devices with a screen:

1. Say, "Go to Settings," or go to the device settings on your Echo Show:
    - If you're using Alexa+, select the **Menu** icon on your screen, and then select **Settings** .
    - If you're using the original Alexa, swipe down from the top of the screen and select **Settings** .
2.
3. Select **Accessibility**.
4. Select **Captioning**.
5. Check the boxes for the captioning settings you want to turn on:
    - **All Captioning**: Turns on all captioning options
    - **Alexa Captioning**: Turns on captioning for Alexa's responses
    - **Closed Captioning**: Tuns on captioning for video playback
    - **Alexa Captioning**: Turns on captioning for Alexa's responses
6.

To manage your Captioning preferences including font style and size:

1. Say, "Go to Settings," or go to the device settings on your Echo Show:

    If you're using Alexa+, select the **Menu** icon on your screen, and then select **Settings** .
    If you're using the original Alexa, swipe down from the top of the screen and select **Settings** .
2.
3. Select **Accessibility**.
4. Select **Captioning**.
5. Select **Captioning Preferences**.
6. Manage your preferences.

Note:

- Not all of Alexa's responses support Alexa Captioning.

- If you turn on both Alexa Captioning and Closed Captioning, only Closed Captioning appears when watching videos.
